

Kasi Viswas

Visakhapatnam, Andhra Pradesh, India
viswaskasi2006@gmail.com | linkedin | github

Professional Summary

Passionate and self-driven Full Stack Developer with hands-on expertise in the MERN stack (MongoDB, Express.js, React, Node.js), currently pursuing my degree while actively building real-world web applications and AI-integrated projects. Adept at designing scalable, end-to-end solutions — from intuitive front-end interfaces to robust back-end architectures. Committed to continuous learning and leveraging emerging AI technologies to build intelligent, impactful products.

Education

Aditya Degree College, Visakhapatnam <i>Bachelor of Computer Applications (BCA) – Computer Science</i>	July 2024 – April 2027 <i>Visakhapatnam, India</i>
NRI Junior College <i>Intermediate – Mathematics, Physics, Chemistry (MPC)</i>	June 2022 – April 2024 <i>Visakhapatnam, India</i>
Sree Krishna Grammar School <i>Secondary School Certificate (SSC) – 10th Grade</i>	April 2021 – May 2022 <i>Visakhapatnam, India</i>

Projects

- V-CHAT: CHAT BOT** | *React, Node.js, Express.js, MongoDB, LangChain.js* | [GitHub](#) **2026**
- Built a full-stack AI chat application supporting multiple LLMs (Gemini, NVIDIA, Ollama) with real-time streaming via Server-Sent Events and a unified model-switching router.
 - Implemented persistent memory using MongoDB and agentic tool execution via LangChain.js, enabling context-aware, autonomous AI responses across sessions.
 - Designed a glassmorphism UI with a live artifact viewer for in-chat component rendering, voice input/output (STT/TTS), and image vision capabilities.
- AI Background Remover** | *Python, rembg, OpenCV, Pillow, NumPy* | [GitHub](#) **2026**
- Developed an AI-powered background removal tool using rembg (U2-Net model) to automatically isolate foreground subjects without manual input.
 - Built an image processing pipeline supporting PNG and JPG inputs with clean transparent PNG output using OpenCV and Pillow.

Technical Skills

Languages: Python, JavaScript, SQL (basic), C, Java

Libraries & Frameworks: React.js, Node.js, Express.js, MongoDB, LangChain.js, NumPy, Pandas

Tools & Platforms: Git, GitHub, VS Code, Vite, Jupyter Notebook, Postman

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networking, REST APIs

AI & APIs: Gemini API, NVIDIA API, LangGraph, Generative AI Integration, Prompt Engineering

Soft Skills: Problem Solving, Self-Learning, Analytical Thinking, Attention to Detail

Certifications

- Machine Learning with Python** | *IBM / Coursera* **Mar 2026**
- Completed the IBM-authorized Machine Learning with Python course covering supervised/unsupervised learning, model evaluation, and ML algorithms using Python.
- C Essentials 1 & 2** | *Cisco Networking Academy*
- Covered fundamentals and intermediate concepts of C programming including data types, control flow, functions, pointers, and memory management.
- Python Essentials** | *Cisco Networking Academy*
- Completed comprehensive Python programming course covering core syntax, data structures, OOP, and scripting for real-world applications.
- AIML Research Paper Publication** | *ULearn*
- Authored and published a research paper in the field of Artificial Intelligence and Machine Learning, demonstrating academic research and technical writing skills.
